- ✚ Clegg's 726-1781 (raccoons and possums)
- ✚ Rid A Pest 240-2266 (raccoons and possums)

If an animal is displaying any signs of **RABIES**
IMMEDIATELY contact the
Carteret County Animal Control at **252-728-8585** or the
Sheriff Dept at **252-504-4800**

FYI

Symptoms usually develop between 20 and 60 days after exposure. Rabid animals may become aggressive, combative, and highly sensitive to touch and other kinds of stimulation and they can be vicious. This is the "*furiosus*" form of rabies, the kind traditionally associated with mad dogs.

There is also a "*dumb*" form of the disease in which the animal is lethargic, weak in one or more limbs, and unable to raise its head or make sounds because its throat and neck muscles are paralyzed. In both kinds of animal rabies, death occurs a few days after symptoms appear, usually from respiratory failure.
